***Specification***

1. The abstract of the disclosure is objected to because it is merely the recitation of claim 1. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: the reference to claim 1 on page 2, lines 3-4, should be deleted as the claim may be cancelled or amended.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2, it is unclear whether the mating part is fixed to the hose bag or the emptying apparatus.

Claims 3 and 6 are confusing as it is unclear if the two limitations are related. Is the bag opened when the blade is in the lockable end position?

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by King et al.

Art Unit: 3754

King et al. shows a hose bag 52; cap-like mating part 35; outlet opening 41; cutting device 42; nozzle 60 and the device is "locked" when the nozzle threads are as far in as they can go.

### **Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rutter et al., Malpas et al., Debentencourt and Laciacara et al. show other piercing devices for containers.
